

DOR Orientation Guide

Welcome to the team · What to know · What to do · Who to call · 2026

Welcome to the team. As a Director of Rehabilitation, you are the clinical and operational leader of your building's therapy department. Your role directly impacts patient outcomes, regulatory compliance, and the financial health of your facility. This guide gives you everything you need to hit the ground running.

Your Role as DOR

Clinical Leadership

- Oversee PT, OT, and ST services across your building
- Ensure evaluations are completed within 72 hours of admission
- Review documentation quality and skilled need language
- Monitor and support therapist and assistant performance
- Lead or participate in IDT / care conference meetings
- Ensure therapy goals are functional, measurable, and updated

Operational Leadership

- Manage scheduling to maintain productivity and CPM goals
- Monitor Med B caseload and billing accuracy weekly
- Review Therascope dashboard every Monday morning
- Communicate payer status changes to billing immediately
- Coordinate staffing coverage — no patient left unscheduled
- Complete the DOR Weekly Self-Audit Checklist every week

Performance Goals — Know These Cold

Productivity

≥84%

Billable treatment time ÷ paid on-site hours. Below 80% requires immediate action plan.

Cost Per Minute

≤\$1.45

Total labor cost ÷ treatment minutes billed. Travelers raise CPM significantly — flag to your regional.

Group/Concurrent

>4%

Mode of treatment target. Appropriate clinical use — not just for productivity numbers.

Med B on Caseload

≥50%

Eligible patients being seen. Review census daily and ensure all Part B patients are being evaluated and treated.

Modified thresholds apply to buildings in a ramp-up phase or with specific regional approval: Productivity ≥80% · CPM ≤\$1.55 · G/C >2% · Med B ≥30%. Your regional director will confirm which threshold applies to your building.

Tools You'll Use

Therascope

therascope-insights.vercel.app

Your weekly performance dashboard. Shows productivity, CPM, Med B, mode of treatment, and revenue MTD. Review every Monday. The DOR Playbook resources are in the Resources tab.

NetHealth

Your EMR / billing system

All therapy documentation and billing. Evaluations, daily notes, goals, discharge summaries, and charge entry. All CPT codes billed through NetHealth.

PointClickCare

Facility-wide EMR

Physician orders, MDS, care plans, and nursing notes. Verify therapy orders in PCC before treatment. Therapy care plan entries required for all active patients.

TheraDocs AI

www.theradocai.com

AI-powered documentation assistant for therapy notes. Use to support SOAP note writing, goal documentation, and skilled need language. Always review and edit AI-generated content before signing — you are responsible for accuracy and clinical accuracy of all notes.

Who to Call — Escalation Guide

Performance concerns (productivity, CPM, Med B)	Your Regional Director / Chief Therapy Officer	Reach out proactively — do not wait until month end
Staffing emergency (no coverage for scheduled patients)	Your Regional Director — same day	Patient safety issue. Escalate immediately, do not wait
Survey arrival or surveyor request	Your Administrator + Regional Director — immediately	Notify both the moment a surveyor walks in. Do not speak with surveyors alone.
Billing denial or audit notice	Billing department + Regional Director	Do not respond to audits independently. All responses go through the company.
Patient safety event or adverse outcome	Facility Administrator + Regional Director — same day	Document the event in the EMR and notify leadership before end of business day.
Documentation or compliance question	Your Regional Director	When in doubt — ask. It is always better to ask first than correct after the fact.
NetHealth or Therascope technical issue	IT support for NetHealth. For Therascope — contact your regional.	Do not let a technical issue result in missed billing or delayed documentation.

The Non-Negotiables

1	Patient care is always first. Metrics matter — but never at the expense of safe, appropriate, individualized therapy.
2	Every patient requires a physician order before treatment begins. No order = no treatment = no billing.
3	Documentation must reflect skilled need every session. "Patient tolerated treatment well" is not a note.
4	Productivity and CPM are your responsibility to monitor — not just to report. Own your numbers.
5	Surveyors can arrive any day. Your department must be ready every day — not just during survey window.
6	Communicate early. A problem flagged on Monday is manageable. The same problem flagged on Friday is a crisis.
7	Your team reflects your leadership. How you document, how you audit, and how you communicate sets the standard.

The DOR Playbook is in your Therascope Resources tab. It has everything you need on documentation, billing, compliance, and clinical standards. Read it. Use it. Share it with your team.
